## DEAR FRIENDS!

**Ten years Welcome to Europe, five years WatchTheMed Alarm Phone:** two transnational networks are more active than ever and have little reason to celebrate in view of the persistently repressive to deadly EU border regime. But they can look back on a **continuous and effective practice** that has left its mark across Europe, built solidarity structures and made countless friendships.

**www.w2eu.info** emerged in September 2009 - in the middle of the fightings during the No-border-camp on Lesbos. In this respect, it was no coincidence that in the past few days over 60 activists with all kinds of migration experiences met again on this Greek island, see <http://lesvos.w2eu.net>. They protested with music flash mobs and memorials in and against the monster hot spot Moria, but above all they were on the road in an effort **to encourage people in transit**, not

least with the fighting experiences of the past ten years there.

Open Arms im August 2019 vor Lampedusa

**alarmphone.org** started in October 2014 as an emergency call project against dying at sea in the central Mediterranean. But at the same time alarm plans for the Aegean Sea as well as for crossings from Morocco to Spain were worked out.

**Over the past five years, the hotline project has accompanied and supported a total of over 2800 boats on all three flight routes.**

Today it is better than ever anchored in the respective regions and communities of refugees and

migrants. Welcome to Europe and Alarm Phone have developed into **continuous infrastructures for the right to freedom of movement**, following the **tenacity of migratory movements** in the fight against the EU border regime. They form practical approaches for **"corridors of solidarity"** from external borders to inner cities. Or as the forthcoming 5-year brochure of the Alarm Phone is titled: **"From the Sea to the City"**.

**"40,000 people filled the streets of Dresden with solidarity on 24 August 2019 - that was not a sign, that is a strong announcement!**

We have made it unmistakably clear: Together we will not only fight against the shift to the right, but also fight for a different, open and free society...". Thus the indivisible coordination group formulates very aptly in an initial assessment of the great mobilization in and after Saxony. **We'll**

**Come United** was one of the main organisers of the **Power Parade Block**, in which more than **10,000 people** led the huge demonstration with ten trucks, see also <https://www.welcome-united.org/de/trucks-3/> .

**"MigrAntifa"** was one of the central slogans to express **new search and connection processes** for the mobilization in Dresden. The **next meeting of We'll Come United** will take place in **Erfurt** in October, where further focal points will be defined and structures expanded. One week later, Bewegungsstiftung will host a **strategy conference in Berlin**. Not least against the background of the mass mobilizations of the climate (justice) movement, many activists from various movements will work together to create a **common reflection space for cross-movement exchange**.

**"Connecting processes!** We consider these to be decisive if we want to make mutual progress in the direction of a **socio-ecological transformation**". Thus the initiative "In which society do we

want to live?" explains its participation in the conference and we will report in the AntiRa Kompass in November about all these perspective discussions for the „**uprisings into the 2020s**“ in more detail.

With solidarity greetings from the Kompass team

## DATES AND INFORMATION FOR OCTOBER 2019

### ON LESVOS: 10 YEARS WELCOME TO EUROPE

In the compass for September we had already referred to the 10-year brochure of w2eu: <http://infomobile.w2eu.net/files/2019/07/w2eu-10years-booklet-EN-201906-screen.pdf>

In the week from 23 to 29 September, w2eu had invited to meetings and actions in Lesbos.

Following the report of a successful music flash mob in the Hot Spot Moria, the following day there was a festival with bands and films and an exhibition of and with refugees and migrants who had fought their way through the Aegean in recent years. There were also two impressive memorials in memory of the people who died in the sea and in the Moria camp as a result of the EU border regime.

### „We sing for freedom in all of our languages“ - Music flash-mob around Moria hot-spot - 27th of September 2019

The olive-grove besides Moria hot spot is huge. More the 13.000 people stuck are under horrible

conditions inside and outside the monstrous hot spot prison Moria. In the olive grove, the informal camp behind the official one, the tents with plastic-covers grew to an own village. With several self-constructed bakeries, street vendors selling vegetables and other stuff along the main street, barbers and various other small businesses... Everywhere dust and the smell of wet clothes, electricity cables, paletts of wood. Overcrowded and hard to imagine and to describe, if you did not see and smell and feel it live. Everywhere children in all ages. Most of their time people spend cueing for food, water, showers, toilets, clothes - and waiting and hoping for a chance to get a transfer to the mainland to finally continue their journey.

And then there is the sound of music. Appearing first in one corner within the tents. Then in the next and in the next... Small groups walk up the hill, mixed teams of musicians and people making connections and chatting in various languages. Many among us who crossed this rocky path before three years, before 10 years - remembering and feeling shared pain with the ones now here. Moving among the tents; through the tiny roads jumping over ropes. Stopping, being invited for tea. Meeting friends from the days before and meeting relatives. And then starting to play, to bring people together. We want to share this moment in which you can just forget for some minutes this whole shit. In teams as mixed as our group to show that solidarity has no borders.

### **IN CONSTANT OPERATION: 5 YEARS WATCHTHEMED ALARM PHONE**

"Five years of WatchTheMed Alarm Phone. 60 months during which we came into contact with around 2,800 boats on the various routes in the Mediterranean and accompanied and supported them on their way. 1,800 days during which we were on standby 24/7 for people in distress at sea. Hardly anyone could have imagined this when the project was launched in October 2014 by around 50 activists. Today, the network comprises around 200 members in many cities in Europe and North Africa." With these sentences begins the introduction of a booklet which will be published on 11 October 2019, the 5th anniversary of the Hotline project. And the Alarm Phone is still in constant operation in September, almost no day and above all no night without emergency calls from the Mediterranean...

### **DE-CONFISCATION NOW! STATEMENT ON THE MALTA-MEETING**

Interior Minister Seehofer had announced in advance that 25% of those rescued at sea in Italy and Malta would be taken up in Germany and that this should be celebrated as a new humanity in the Mediterranean Sea at a small summit of EU interior ministers (with a new Italian colleague) in Malta. Even Der Spiegel describes the meeting as a further summit of fortress Europe. In a joint statement, several sea rescue and anti-racist organisations had summed up the hypocrisy of the meeting in advance. We document:

#### **De-Confiscation of all Rescue Ships NOW! September 23, 2019**

In light of today's meeting in Malta where five EU interior ministers convene to discuss a relocation quota for migrants rescued in the Mediterranean, we issue this collective statement to demand the immediate release of all NGO rescue ships: „The EU border regime blocks all safe legal passages and forces refugees and migrants to move on hidden routes and travel on unseaworthy boats. Shame on you. The EU is unwilling to organise a proper sea-rescue program for those affected by their policies. Instead, illegal push/pull-back collaboration between aerial assets of the EU and Libyan forces is a daily practice.

Shame on you.

When individuals and organisations from the civil society intervene to rescue lives at sea, the EU and its member states criminalise them. While people are dying and drowning, the EU and its member states keep life-saving rescue ships confiscated. Shame on you.

We demand:

- Immediate de-confiscation of all civil rescue ships in Italy!
- Immediate end to the EU collaboration with Libyan forces!

- No continued efforts to criminalise sea rescue!
  - Open harbours in Italy and Malta, immediate disembarkation after rescue!
  - Quick relocation and distribution of refugees and migrants according to their wished destination countries and particularly in collaboration with solidarity and sanctuary cities all over Europe!
- Sea Watch, Mediterranea Saving Humans, Welcome to Europe-Italy, Borderline-Europe, INURA, Ajuntament de Barcelona-Global Justice Department and WatchTheMed Alarm Phone

Breaking the Culture of Deportation - Deportation is the last ring of the slavery chain | RefugeeBlackBox - Solidarity (Initiated in 2017)

Do you want to live in a world where we refugees and migrants are not reduced to numbers without

dignity? Where millions of us do not have to risk our lives in the desert or the Mediterranean Sea to seek a better life? Where we are not divided into bad and good ones? In a world where refugees are not only „welcome“ and treated as objects by German and European charity and paternalistic Networks? Do you want us to be the designers of our own lives and struggles in solidarity with each other?

Do you want to live in a world that guarantees the right to freedom of movement to everybody in this world and not only those of privileged countries, without fear of oppression and persecution? Do you want to unite with others in solidarity to fight everyday racism, the colonial injustice of deportation and exclusion of refugees? Do you want to effectively do something to improve society towards peace and justice? Come to The VOICE Refugee Forum celebration of 25 years of self-organization of autonomous refugee struggles!...

### 05.10.2019 PFORZHEIM: ACTION DAY AGAINST DEPORTATION PRISON

**Aktionstag**  
**Sa. 5. Okt. 2019 - 11-18 Uhr**  
rund um das  
**Abschiebegefängnis in Pforzheim**  
**Abschiebehaft abschaffen!**  
**Isolation durchbrechen!**  
Protest an verschiedenen Stationen mit  
Musik, Redebeiträgen, Film, Aktionen und  
euren Ideen!

On 5 October 2019, the Antiracist Network Baden-Württemberg is calling for a day of action around the deportation prison in Pforzheim: "...In Pforzheim innocent people are in prison. They did not have the right papers, they had claimed their right to freedom of movement. For this reason alone they are in prison, sometimes for months. Prisoners who do not willingly sign everything,

protest or even exercise their right to freedom of expression are punished with solitary confinement inside the prison. There are separate cells for this.

The isolated have no contact with other prisoners. They have to wear institutional clothing, are not allowed to shower or change clothes. During the isolation they are not given anything to shorten the time. No book, no magazines, no prayer chain, no radio - nothing. And they don't know how long they have to stay in solitary confinement. That can be up to eight gruelling long days.

Deportation and solitary confinement must stop!

**10.10.2019 BERLIN: PREMIERE OF THE MEDITERRANEAN MONOLOGUES**

Stage for Human Rights in Berlin - Documentary Theatre

After 700 performances of the Asylum-Monologues, Asylum-Dialogues and NSU-Monologues, the... MITTELMEER-MONOLOGE narrate of the politically resistant Naomie from Cameroon and Yassin from Libya, who find themselves on a boat to Europe, of brutal 'coast guards' and dubious sea rescue centres and of activists\* who oppose dying on the Mediterranean.

Activists from the Alarm Phone make pressure to the coastguards to look for people in distress at sea or learn at Seawatch to save people from drowning - in short, they do the most natural thing that is anything but self-evident in 2019: to save human lives.

It is as if the actors reach out directly to the people in the audience, reach out to them and drag them into a world that will no

longer leave the viewers cold from now on: entangled, intertwined, connected and networked with the protagonists of the Mediterranean monologues, the audience follows the paths of the narrated stories with excitement ....

The Mediterranean monologues will celebrate their premiere on 10 October 2019 in the home port of Neukölln. Following this, we would like to present the Mediterranean monologues germanwide.

After each performance there will be an audience discussion.

**PLEASE WRITE TO US AT INFO AT BUEHNE-FUER-MENSCHENRECHTE.DE IF YOU WOULD LIKE TO HOST THE MEDITERRANEAN MONOLOGUES.**

**12.-14.10.2019 ERFURT: MEETING OF WE'LL COME UNITED**

Foto: Umbruch Bildarchiv 2019

After the successful mobilisation in Saxony on 24 August, this meeting will focus on the further perspectives of the network. The "MigrAntifa" approach was mentioned in the introduction, but it is also about the consolidation of the supraregional

networking of self-organization and last but not least about the questions which priorities and forms of action are to be set for 2020.

### **18.-20.10.2019 BERLIN: STRATEGY-CONFERENCE OF BEWEGUNGSSTIFTUNG**

"...The challenges ...

Social problems such as climate change, fortress Europe and the shift to the right confront social movements with major strategic challenges. The strategy conference provides space to ask questions, learn from each other and find answers.

The conference ...

Together with many activists\* from various movements, we will create a common space for

reflection - for cross-movement exchange, for learning from each other and for making plans. We focus on effective strategic approaches in political action and the bundling of our forces.

Bewegungsstiftung thus wants to make a contribution to strengthening social movements. (...)

**REGISTRATION ABSOLUTELY NECESSARY! AND DEADLINE WAS ACTUALLY ALREADY THE 29.9.19...**

### **21.10.2019 BERLIN: "RETURN AT ANY PRICE?" - MEDICO EVENT**

Migration policy, counselling reality and situation in the countries.

Symposium (10:00-18:00) and evening event (19:00-21:00) on 21 October 2019, Location: Heinrich Böll Foundation - Federal Foundation Berlin, Schumannstr. 8, 10117 Berlin

The event is organized by Brot für die Welt, medico international, PRO ASYL and the Heinrich Böll Foundation.

It is the declared aim of the Federal Government to increase the number of departures and in many cases it also dominates migration policy decisions in the EU. For this purpose, deportations and means to promote "voluntary return" are increasingly used. This project is being pursued irrespective of the situation in some countries of origin, which contradicts a safe return and reintegration.

In the pursuit of regulatory interests, development cooperation and programs to promote "voluntary return" are increasingly being used. By 2020, the BMZ has earmarked some 150 million euros for the "Perspective Home" program alone in order to support return to countries such as Kosovo, Afghanistan or Nigeria and to facilitate reintegration.

With this symposium we would like to draw a bow from the political debate here to the situation on the ground. What does it mean for refugees and migrants to return to countries marked by violent conflicts? Under what conditions can sustainable reintegration be assumed? How "voluntarily" does the return actually happen today and what do counselling centres find themselves confronted with? What is the scope for action?

We would like to discuss these and other questions together with invited experts. An invitation and a detailed program of the event will follow in the coming weeks.

**REGISTRATION IS REQUIRED FOR THE SYMPOSIUM. PLEASE USE THE REGISTRATION FORM AT:**

### **„ME AGAINST ABSCHIEBUNG“ – CAMPAIGN FROM MUNICH**

„Seit “For over 20 years now we have been involved with our festival against deportations. Recently we have noticed that more and more people react to our topic with shrugging their shoulders, with ignorance or even acceptance. The outrage is noticeably diminishing. Deportations are now part of our everyday lives. We have long been accustomed to people being regularly picked up, imprisoned and forcibly deported into a mostly uncertain future. All too often we have heard of families being separated, schoolgirls being taken out of class, sick people being picked up from the clinic and even flown out to crisis areas such as Afghanistan. The main thing is that they are gone. Do you agree?

**Never!**

We do not agree! Let's send a strong signal together against insensibility! Let us take a stand and show position! It depends on each and every individual! Let us finally get into a rage and together with Rachel, Roland, Agnes, Jochen, Eva, Katja, Jens and you become active against this inhuman deportation policy.

#### **Join us!**

Join our campaign "ich against abschiebung". Position yourself against deportations with your name and your face and support us! Upload a photo of you and your name and show it: I am against deportation!..."

### **ROUNDLETTER NO. 3 OF „IN WHICH SOCIETY DO WE WANT TO LIVE?“**

Global climate strike, Feminist Futures Congress, the persistence of migration and sea rescue, Transborder Summer Camp and indivisible demo in Dresden ... **"Five current highlights that encourage and give hope** that we will not be inactive against the shift to the right and the authoritarian and populist formations. Social movements have a grown mass base, contested spaces in many fields. But let's not kid ourselves, the polarization of societies not only in Germany continues. The election results in Saxony and Brandenburg show us this not least. We are facing further

major challenges everywhere, but we do not have to hide our pole for a climate-justice, open and social society.

In this respect, the **strategy conference from 18 to 20 October**, which we already advertised in our last newsletter, comes at the right time. (...) Part of this conference will be shaped by our initiative and the questions of "In which society do we want to live? It is planned - alternating between small and large group discussions - to deepen the cross-movement search process, both in the focussed exchange of specific topics and with debates on challenges that affect us all. We therefore initiate cross-over discussions linked to the question of how we can, among other things, more strongly interconnect the social movements mentioned above.

We will document the (interim) results of this conference as comprehensively as possible and make them the starting point for what will be the focus of "In which society ...?! in 2020": **Connecting processes!** We consider these to be decisive if we want to make mutual progress **towards a socio-ecological transformation.**"

### **That wasn't a sign, that was a strong statement!**

40,000 people filled the streets of Dresden with solidarity on 24 August 2019. We made it unmistakably clear: Together we will not only fight against the shift to the right, but also fight for a

different, open and free society, in which people of different religions, origins and sexes live together on equal terms and in which poverty, injustice and discrimination belong to the past!

The second, no less important message is: the East can also be different! The vast majority of the participants came from Dresden and the surrounding area. Together with thousands of people from all over Germany, we have organised one of the biggest demonstrations Dresden has seen since 1989. The solidarity society already exists. We don't give up - neither in Saxony nor elsewhere!..."

**Umbruch Bildarchiv** introduces a great picture series with the following sentences: "Something happened on August 24, which seemed not to be possible in the face of the devastating conditions and effects of the shift to the right. Together there were 40,000 on the streets of Dresden, to bring together what belongs together. Namely all those who struggle against the continuing division and racism of this society."

### **31.8.2019 PADERBORN AND BÜREN: BIG DEMO AGAINST 100 YEARS OF DEPORTATION PRISON**

From a speech I didn't make:

"...7231 people I alone have met behind the walls of the deportation prison. With the members of the association there are still many, many more. An unimaginable number. They have all been stolen from us and we from them. Human thieves are the people who deport others. Damned to steal people is one of the biggest crimes the state has com-

mitted in recent years. But it is not only the state, it is also the people who hide behind it. It is the employees of the Federal Office who steal people because they do not give them asylum. They are employees of the immigration authorities who steal them by picking them up at night. It is the policemen who help to steal people if they support the immigration authorities. It is the prison employees who steal people by imprisoning them. They are federal police officers and pilots who steal people by carrying out deportations. 7231 people were stolen. 7231 people. I know that if they hadn't been stolen, they would all have come to the demonstration here today. How many of them live in poverty, how many of them have been tortured, how many are dead, I don't know. And I do not want to know, because I cannot and will not bear it. If someone asked me why I go to jail every

Thursday, I would tell him today it is the number 7231, or much better, it is the people behind the number. They are all a reason to go there regularly. They are a reason to engage me against this inhuman deportation machine. I hate the deportation prisons. I hate them, whether they are in Büren or elsewhere. And that is why we must take action against them. We must close them down.

Deportation prisons to forest glades, playgrounds or cool housing projects, no matter what, the main thing is that they are gone. Finally let us demolish all these prisons and with them the complete deportation machinery! Everyone should have the right to live where his feet carry him in a free world!..."

## 20.9.2019 GLOBAL STRIKE OF THE CLIMATE (JUSTICE) MOVEMENT

**The biggest climate strike in history - and that was just the beginning!**

On September 20, 1.4 million people took to the streets in 575 towns and cities throughout Germany under the motto #AlleFürsKlima to demonstrate for consistent climate policy and adherence to the 1.5 degree target. At almost the same time, the Climate Cabinet in Berlin presents an absolutely inadequate "climate package" and calls it a "breakthrough". 20.09. is a day that leaves us speechless - in many respects.

...

**THE WHOLE STATEMENT HERE:**

[HTTPS://FRIDAYSFORFUTURE.DE/RUCKBLICK-ALLEFUERSKLIMA1/](https://fridaysforfuture.de/ruckblick-allefuersklima1/)

## Seebrücke (sea-bridge) on strike!

What a success: On September 20, 1.4 million people in Germany alone went on strike for climate justice! The SEEBRÜCKE was on the road. In Berlin, for example, activists from the SEEBRÜCKE and from Ende Gelände blocked main roads to show that we would not let the Climate Cabinet get away with the disastrous proposals. In Cologne, Hamburg, Stuttgart and many other cities the SEEBRÜCKE followed up with a poster campaign during the action week: The climate crisis is a racism crisis! SEEBRÜCKE is committed to safe flight routes and safe harbours and stands in solidarity with all those fighting for climate justice.

The perpetrators of the climate crisis in Europe are shutting themselves off and accepting that people die every day in the Mediterranean. The lack of a climate policy is not a coincidence, but a conscious policy of omission.

The SEEBRÜCKE is confronted with this policy on a daily basis: European politics can more easily imagine the mass drowning of people in the Mediterranean or the greatest extinction of animal species in the history of the earth than a fundamental change in the current economic system.

Yesterday we showed them all together: We, civil society, no longer accept this!

Climate justice means international solidarity, safe flight routes and freedom of movement for all!

## OUTLOOK

### 01.-03.11.2019 TRIBUNAL GOES CHEMNITZ

Invitation to Chemnitz - Come all!

We will hold a 3rd tribunal in November 2019 in Chemnitz and Zwickau, after Cologne 2017 and Mannheim 2018. At the tribunal in the Schauspiel in Cologne-Mülheim, the voices of the relatives of murder victims and survivors of the NSU terror series were used to accuse those responsible for the still unresolved NSU complex. In Mannheim, the history of migration in the FRG and the struggles of those affected by racism from a Baden-Württemberg focus were discussed further, told and made visible.

From November 1 to 3, we will organize another tribunal in Chemnitz and Zwickau, the cities in which the NSU terror group lived well networked during its series of murders, where in October 2018 right-wing hunts on migrant women\* and several arson attacks on migrant restaurants were carried out. We will indict those responsible for racist violence at the scene of the perpetrators and demand justice together with those affected. We will make the continuity of migration in Saxony visible, together we will sue for the society of the many, raise our voices and assert. We are the future, also in Saxony.

FURTHER INFORMATION WILL BE UPDATED HERE: [HTTPS://WWW.NSU-TRIBUNAL.DE/TRIBUNAL/](https://www.nsu-tribunal.de/tribunal/)
